

AC3File

[ac3file](#)[guides](#)[downloads](#)

AC3File is a DirectShow source filter. It is required to read any kind of AC3 or DTS files. There are many kinds of AC3 and DTS files. Some files are ripped from AC3/AudioCD or DTS/AudioCD, some files are ripped from DVD in PES container some files may have different byte order. All of these files are supported by AC3File.

Following AC3 formats supported:

- 8bit
- 16bit big and low endian
- SPDIF-padded AC3 (any number of bits and endian)

Following DTS formats supported:

- 8bit
- 14bit big and low endian
- 16bit big and low endian
- SPDIF-padded DTS (any number of bits and endian)
